

A Perfect Drop-in to Fun

Secure Entry to the New WUB Skate Hall in Innsbruck

Fun sports are popular with young people around the world – skater halls are the place-to-be. The WUB Skate and BMX Hall that opened in late 2011 in Innsbruck does not need to shrink from international comparisons.

Austria's largest indoor skate park features 1,900m² to satisfy all the demands for sports and fun. Numerous obstacles and steep ramps provide beginners to pros everything a skater could want.

During the week, the skate hall is used daily by 100 athletes and on weekends by more than 300 visitors. In order to use the hall for various events and activities, it was equipped with a grandstand for spectators. WUB Skate Hall is part of Olympiaworld Innsbruck, which offers a combination of fun and trend sport facilities, and is used as a venue for many events.

Sebastian Saxer, Business Administrator Marketing BAW, Marketing / Fun & Trend Sport Halls

“SKIDATA and Olympiaworld Innsbruck are linked by a long and successful collaboration over many years. The skilled and experienced employees try to implement every input immediately and continuously develop the system.”

Client

Olympiaworld Innsbruck –
WUB Skate/BMX Hall

Task

- Reliable and fail-proof,
- based on state-of-the-art technology,
- cost-effective access system – including POS system to sell barcode and RFID tickets
- Easy access with bicycles
- Single-source, turnkey solution

Solution

The latest SKIDATA turnkey system designed specifically to meet the needs of small and mid-sized installations in the recreational and events field.

SKIDATA.Logic
‘People Access Basic’

Access Management for Austria’s Largest Indoor Skate Park

Olympiaworld Innsbruck and SKIDATA have worked together successfully for many years. After successfully handling various major events such as the 2008 European Football Championship and the 1st Olympic Youth Winter Games in 2012, the partnership is being strengthened further. SKIDATA is responsible for access management at WUB Skate and BMX Hall, which is located in Olympiaworld.

SKIDATA met the requirement for a reliable and cost-effective access system based on state-of-the-art technology, including POS system to sell barcode and RFID tickets, with its new turnkey system. Using SKIDATA.Logic ‘People Access Basic’ the customer profits from the advantages of working on a network. These SKIDATA solutions are designed specifically for small and mid-sized installations in the recreational and events field.

With SKIDATA, convenient access to fun, action and adrenalin is assured. The installed access system provides the desired solution for ticketing, POS and access from a single source. A swinging door provides customers access to the skate hall with their own BMX bike. The POS system Manual.Cash can issue day passes or season passes, including a photo. With SKIDATA’s web-based solutions, WUB Hall outsourced its cost-intensive server infrastructure to SKIDATA. SKIDATA is responsible for system service and maintenance, which ensures the system is always state-of-the-art.

Special Features

- **Individual, Single-source Solution**
Meeting client requirements. The access management system from SKIDATA offers the right solution from a single source for ticketing, POS and access.
- **Cost-efficiency**
Cost-intensive server infrastructures are no longer needed – an internet connection is sufficient. Downstream maintenance and service costs for server infrastructure disappear.
- **Always up-to-date**
Clients can focus entirely on their core business. Service, operation, etc., is carried out by SKIDATA. The system is always state-of-the-art.
- **Future-proof**
Additional Point of Sale terminals and access points as well as system functions are no problem. The system is expandable and also offers interfaces to webshops, additional sales channels, etc.
